

## **JALPON™ 5300 & 5300 FAST DRY** **High Solids, Firmer Film Rust Preventive Compounds**

### **GENERAL DESCRIPTION**

Jalpon™ 5300 and 5300FD (Fast Dry) are high solids, lower VOC, moderately formulated rust preventive concentrates comprised of gelled calcium sulfonate and other components that yield a relatively tack-free coating. The high non-volatiles and lower viscosities of these products makes for easier handling compared to other high viscosity products.

### **TYPICAL PROPERTIES (NOT SPECIFICATIONS)**

		<b>J5300</b>	<b>J5300FD</b>
Non-Volatile, Wt. %	ASTM D2369	70	70
Viscosity, Brookfield #5 @ 10 rpm, cP	ASTM D2196	10,000 - 25,000	5,000 - 20,000
Flash Point, °F (°C)	ASTM D93	>100 (>38)	>100 (>38)
Density, Pounds per Gallon @ 15.6°C	ASTM D1475	8.1	8.1

### **APPLICATIONS**

Jalpon™ 5300 and 5300FD are good rust preventives offering extended salt fog performance (AS™ B117). They can be used as ballast tank coatings, truck chassis coatings, long-term storage of parts, aircraft OEM, maintenance coatings, and can also be used to coat farm implements. Jalpon™ 5300 and 5300FD are both effective at holding rust in check when applied over existing rust (as long as it is not flaking). When used on mower decks, Jalpon™ 5300 and 5300FD helps prevent grass build up on the deck in addition to keeping it free of rust. Jalpon™ 5300 and 5300FD are REACH registered.

### **AVAILABILITY**

Jalpon™ 5300 and 5300FD are available in 55-Gallon Open Head Drums.
